

CHILD SAFETY SEAT CHART

Physician's Name: _____ Date: _____

Child's Name: _____ Age: _____ Height: _____ Weight: _____

	<input type="checkbox"/> INFANT (birth to age 1)	<input type="checkbox"/> TODDLER (age 1 to age 4)	<input type="checkbox"/> YOUNG CHILDREN (age 4 to age 8)
AGE & WEIGHT GUIDELINES	Birth to 1 year of age AND less than 20 pounds	1 year of age AND at least 20 pounds and up to 40 pounds	Less than 8 years of age AND at least 40 pounds, but less than 80 pounds AND less than 54 inches tall (4 ½ feet)
TYPE OF SEAT	INFANT CARRIER SEAT 5 to 22 pounds OR CONVERTIBLE REAR/FRONT-FACING SEAT IN REAR-FACING POSITION 5 to 30/35 pounds (Check seat for actual rear-facing weight limit.)	CONVERTIBLE REAR/FRONT-FACING SEAT Rear-facing between 5 and 30/35 pounds (Check seat weight limits.) Front-facing between 20 and 40 pounds OR FRONT-FACING ONLY TODDLER SEAT 40 pound weight limit with harness system	BELT-POSITIONING BOOSTER SEAT Low-Back Booster Use when vehicle has head rest protection in the back seat. High-Back Booster Use when vehicle does not have back seat head rests.
POSITION	ALWAYS position your infant rear facing regardless of weight. Your infant must face the rear at least until he or she reaches the age of 1 and is at least 20 pounds.	Positioning depends on the weight of your toddler. If your one-year old is at least 20 pounds , you can face your toddler forward . However, your toddler is safest when facing the rear. It's a good idea to use a convertible seat to its rear-facing weight limit.	Position your child in a booster seat (forward-facing only). A booster seat can only be used in a vehicle with lap and shoulder belts in the rear seats.
HARNESS STRAPS	Harness straps must be at or below the shoulder level, and fit snugly. Harness clip must be at armpit level.	When front facing in a convertible seat, harness straps must be in the top slots. Harness clip must be at armpit level.	Use both lap and shoulder straps. The lap strap must fit low and tight across the lap and upper thigh area. The shoulder strap must fit snug across the chest and shoulder.

WARNING! – All children under the age of 12 should ride in the back of a car. Shoulder straps should NEVER be placed under the arm or behind the back when used by children or adults.

The SAFEST place in a vehicle for children is in the BACK SEAT.

NEVER place a rear-facing infant seat in the front seat of a vehicle with an airbag on the passenger side.

**RHODE ISLAND
CHILD RESTRAINT LAW**

Children under seven (7) years, less than fifty-four (54) inches (4½ feet tall) and weighing less than 80 pounds (maximum weight limit of a booster seat) must be transported in the rear seating position of a motor vehicle and properly restrained in a child restraint system (booster seat).

Exceptions –

Children under age seven (7) are exempt from being transported in the back seat

- IF:** (a) the vehicle has no rear seating position (i.e., pick-up, sports car).
 (b) all rear seating positions are already being utilized by other children. In the (b) situation, the oldest child should ride in the front seat if the vehicle is equipped with passenger side air bags.
